

OTP (One-Time Password) Display Card

Two-factor Authenticator in a convenient card form factor.

Introducing **SurePassID OTP Cards**, the next level of identity security that:

- **Reduces costs** by preventing fraud and lowering overhead
- **Secures your enterprise** with a single convenient credential that employees love
- **Delivers compliance** with regulatory requirements like PCI, HIPAA, and FFIEC

Username and password are no longer secure enough for today’s enterprise information security requirements. With SurePassID OTP Cards, you will **elevate the security level** of your customers or employees and **lower your overall risk** of a security breach.

SurePassID OTP Cards **work with your existing infrastructure**: industry standard OATH HOTP, TOTP, OCRA, HID physical access, .NET or Java Card smart chips.
