

SurePassID Authenticator App Datasheet

Simple and Strong Mobile Two-Factor Authentication

SurePassID Mobile Authenticator app is the most versatile one-time passcode generator designed for all types of users. SurePassID Authenticator offers OATH compliant Event (HOTP) and Time (TOTP)-based codes, including support for Dynamic CVx codes for card issuers to replace the printed 3-digit code on the backs of credit cards.

SurePassID Mobile Authenticator app turns your mobile phone into a convenient and free authentication device that prevents hackers from stealing your login credentials and keeps them from gaining access to your accounts and transactions.

SurePassID Mobile Authenticator App – The Right Choice for...

Large enterprises and government organizations mandated to reduce user authentication costs yet increase security or needing to comply with security regulations.

Small and medium enterprises needing a no-cost solution for highly effective two-factor authentication or needing to comply to PCI requirements.

Companies seeking to securely embrace mobile technologies such as mobile banking and mobile wallet access with a simple, effective and no-cost strong security solution.

Features

- **Simple and Strong Mobile Authentication** – When OTP codes are needed, use what you already have – your mobile phone. And best of all, it’s free forever.
- **Works with OATH servers** – OATH-compliant codes for On-demand event-based (HOTP) or Time-based (TOTP) one-time passcodes. Great for VPN access or when you have no network connection.
- **Add account via QR code or direct entry** – the administrator determines the provisioning method for an optimum deployment experience.
- **Unlimited Accounts** – multiple accounts can be added to support any number of OTP login requirements and settings.
- **Brandable Skin** – Companies or MSP’s can brand the app to match the company’s color scheme and logo.
- **Simple and convenient user experience:**
 1. Enter username and password into your app login screen.
 2. Open SurePassID Authenticator
 3. Enter the current code displayed (TOTP) or generate a new code on-demand (HOTP).

Benefits

- **Simple and Strong account logins**
- **Secure, MFA access, OATH compliant**
- **Maximum flexibility**
- **Rapid deployment**
- **Reduced costs and complexity**

Works with **SurePassID Authentication Server or Cloud Service** or any OATH compliant server.
