SurePassID Treo Pro, All-In-One USB Token

Three Authentication Methods in One Convenient Device for Account Logins

1) **FIDO U2F USB Key** - insert into any USB port to deliver a one-time FIDO U2F key code
2) **FIDO2 USB Key –** the latest in the FIDO family of universal tokens that eliminates passwords – just enter the PIN associated with the **Treo Pro** and press the button!
3) **OATH HOTP** - standard OATH 6-digit event-based One-Time Password via USB for applications that need an OATH OTP such as VPN connections

Treo Pro FIDO/HOTP Token via USB – just press the button!

Treo Pro USB Token – press button to send FIDO code or to send an OTP (it knows which to send)

SurePassID Treo Pro USB Token combines FIDO2, FIDO U2F and OATH authentication functions in one convenient, low cost device. Register the FIDO token with any FIDO-enabled website or mobile app such as Google, DropBox, GitHub and others. Use the OTP for VPN and other OATH-enabled applications. FIDO2 authentication uses a token PIN to eliminate the password.

To register your FIDO Key - refer to the FIDO registration instructions from your network administrator or the instructions provided by your FIDO-enabled website or mobile app.

To obtain your OATH OTP Seed file – If you are using SurePassID Authentication Service, the serial number and secret key will be uploaded into your account. If you are not using SurePassID Authentication Services, the serial number and secret key of the built-in OATH HOTP code are printed and attached separately. Please keep this in a safe and secure place. If you require the secret key file in a machine-readable format please contact helpdesk@surepassid.com.

Need an Authentication Server or Cloud Service? Contact a SurePassID representative today to sign up for a *free 2-month trial of SurePassID Authentication Service* for two-factor authentication solutions for web, mobile and enterprise applications.

Visit our website for more authentication products and services.

The Treo Pro and other FIDO/OATH tokens work with **SurePassID Authentication Service and other certified OATH and FIDO servers** - **SurePassID Server** and **the Treo Pro** are **FIDO-Certified.**
