

PIN-Safe One-Time Password (OTP) Card

PIN-protected Two-factor Authenticator in a convenient card form factor.

Introducing **SurePassID PIN-Safe OTP Cards**, the next level of identity security that:

- **Reduces costs** by preventing fraud and lowering overhead
- **Secures your enterprise** with a single convenient PIN-protected card
- **Delivers compliance** with regulatory requirements like PCI, HIPAA, NIST, and FFIEC

Username and password are no longer secure enough for today’s enterprise information security requirements. With SurePassID **PIN-Safe OTP Cards**, you will **elevate the security level** of your customers or employees and **lower your overall risk** of a security breach.

- e-Paper display – easy to read
- SurePress Tactile “click” buttons
- User-changeable PIN
- Time-based (TOTP) or Event-based (HOTP)
- Additional functions available: Challenge-Response, Transaction Data Signing (TDS)

SurePassID OTP Cards **work with your existing infrastructure**. Industry standard OATH HOTP, TOTP, OATH Challenge-Response Algorithm (OCRA), and TDS.
