

# TapID® Security Card with FIDO2 NFC

## Frictionless, Phishing-Resistant MFA for Android/iOS

- Transforms any payment or ID badge card into a FIDO2/WebAuthn authenticator
- FIDO2 passcode is transmitted wirelessly and securely with a simple tap of the card to smartphones and other NFC-enabled devices
- No extra hardware devices, SMS texts, or mobile apps required
- Seamlessly provisioned within standard EMV card personalization processes
- Printable in standard ID badge printer or with custom graphics
- SDK and REST API for WebAuthn embedding into Android/iOS mobile apps and web applications

Standard-issue payment and ID badge cards

No change to user behavior, payment gateways, or card personalization processes

Tap-and-go authentication for website/app logins and payments – with no passwords or costly SMS authentication
